

# GRANDTYME

Issue #3 – December 2007

**HAPPY HOLIDAYS!!**

**And thanks for your continued support!!**

**- Kris and Steve**

## Feature Product

JVC's line of DILA front projectors produce a breathtaking image - they definitely deserve the accolades the reviewers typically give them. The HD1 is a 1080P projector with 15,000:1 contrast ratio. Its sibling is the HD-100 with an even higher 30,000:1 native contrast. The image these projectors create is hard to beat. We have just installed an HD1 in our showroom - come by and see what all the fuss in the projection world is about.

## Product Update

We recently have taken on 2 exciting new lines. JVC "Precision" offers high performance LCD HDTVs and 2 models of front projectors. The LCDs offer what is some of the industries best anti-blur technology in their second generation, 120Hz processing. The crystal clear, bright and colorful image created by these sets is astounding. We have one in our showroom - stop by and be amazed!!

We are excited to have become Vutec screen dealers. Vutec offers some of the industries best front projection screen technology - one example is their SilverStar model. It offers an incredible gain, high contrast, great performance in high ambient light. The "pop" and 3D nature of images on these these screens make them an industry favorite. There line is large and all encompassing. We can address almost any screen need and budget with this great line of screens.

## Tech Tip

**Universal Remote Controls - not what they used to be and a Great Gift!!!**

Modern universal remote controls continue to grow in capabilities and ease of programming. Imagine entering your media room and selecting the single "Watch Movie" button on the remote. The DVD player, A/V receiver and projector come to life and configure themselves. The room lights dim to the preset "movie watching" level. The screen curtains open and expose the screen and the movie begins. Most of this functionality is possible using remote controls starting at \$150. Some are programmed by selecting your components you have on a website. The website walks you through configuration and you then plug the remote into your PC and it gets programmed!

## Showroom Hours

**Mon - Sat 9AM to 1PM** Or we are more than happy to meet you at your convenience.

**Check out our revised and improved Web-Site!!!**

## Big Screens - Small Prices
